**The Maths Factor : Make Carol Vorderman Your Kids Online ...**

In the problem  $3 \times 4 = 12$ , 3 and 4 are factors and 12 is the product.. Factoring is like taking a number apart. It means to express a number as the product of its factors. Factors are either composite numbers or prime numbers (except that 0 and 1 are neither prime nor composite).. The number 12 is a multiple of 3, because it can be divided evenly by 3.
